

# Computer and Information Technologies

Subject: 805-182 Computer: the Internet and Society

Dr. Norrathep Rattanvipanon

Courtesy of: Dr. Jirawat Thaenthong

# Update

- PDF slides are posted before class
- Make sure to check the slide again after class
- I might update them during class
- PPT slides will be posted after class

# Penalty for Turning in Work Late

- Deduct 25% of the original full score
- This information is updated and shown on the course's website.

Everyone has found a team...

...But one person hasn't completed the survey

- No penalty for the first homework assignment
- Please finish it ASAP

# Covid-19 Update

- Phuket airport is open for domestic flights
- Beaches in Phuket are also open
- No nation-wide curfew in Thailand

# Outline

COMPUTER  
SYSTEMS

TASKS

INFORMATION  
TECHNOLOGIES

TASKS

Q & A

# What are Computer Systems?

- Technology for making people's lives **more convenient**
- Consisting of **hardware** and **software** working together
- Computer system in our daily activities: perform **calculation**, play **games**, watch **movies** from Netflix, drive **cars**, launch **rockets**, provide mobile communication, etc.

# How do computers look?

# What about these?

# Computer Size

- Supercomputers
- Mainframes
- Workstations
- Servers
- Microcontroller

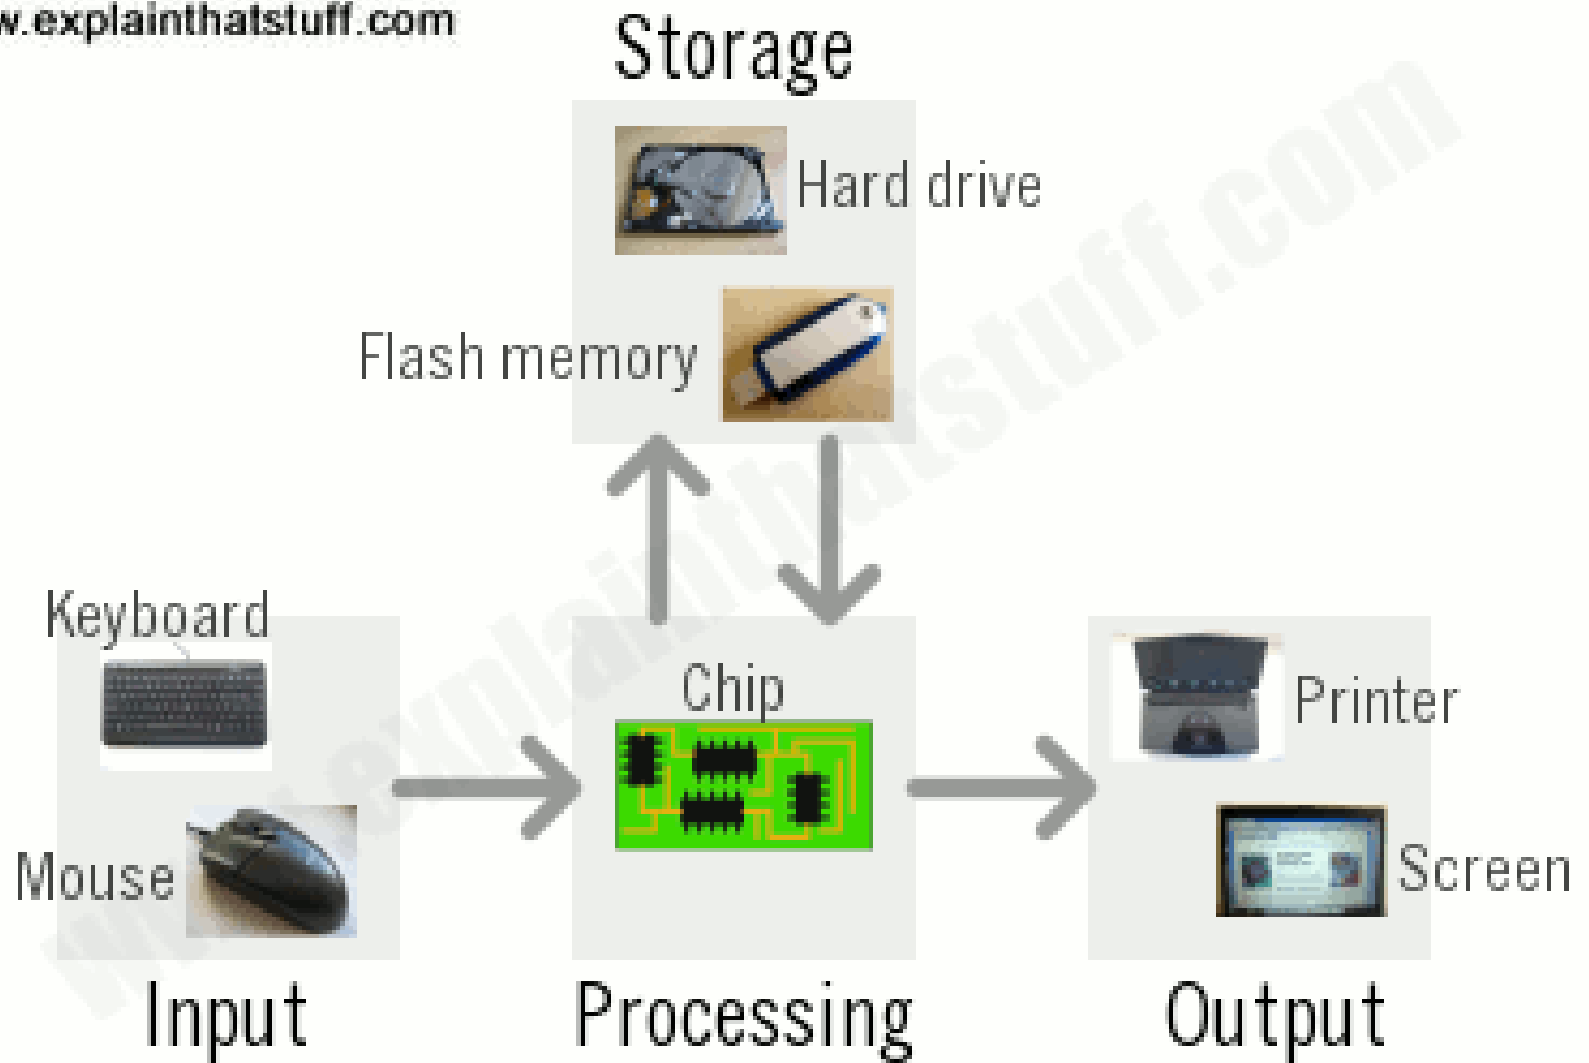

HOW COMPUTERS WORK

**CPU, MEMORY  
INPUT &  
OUTPUT**

**Khan Academy**

# Computer System Components

# Computer System Components

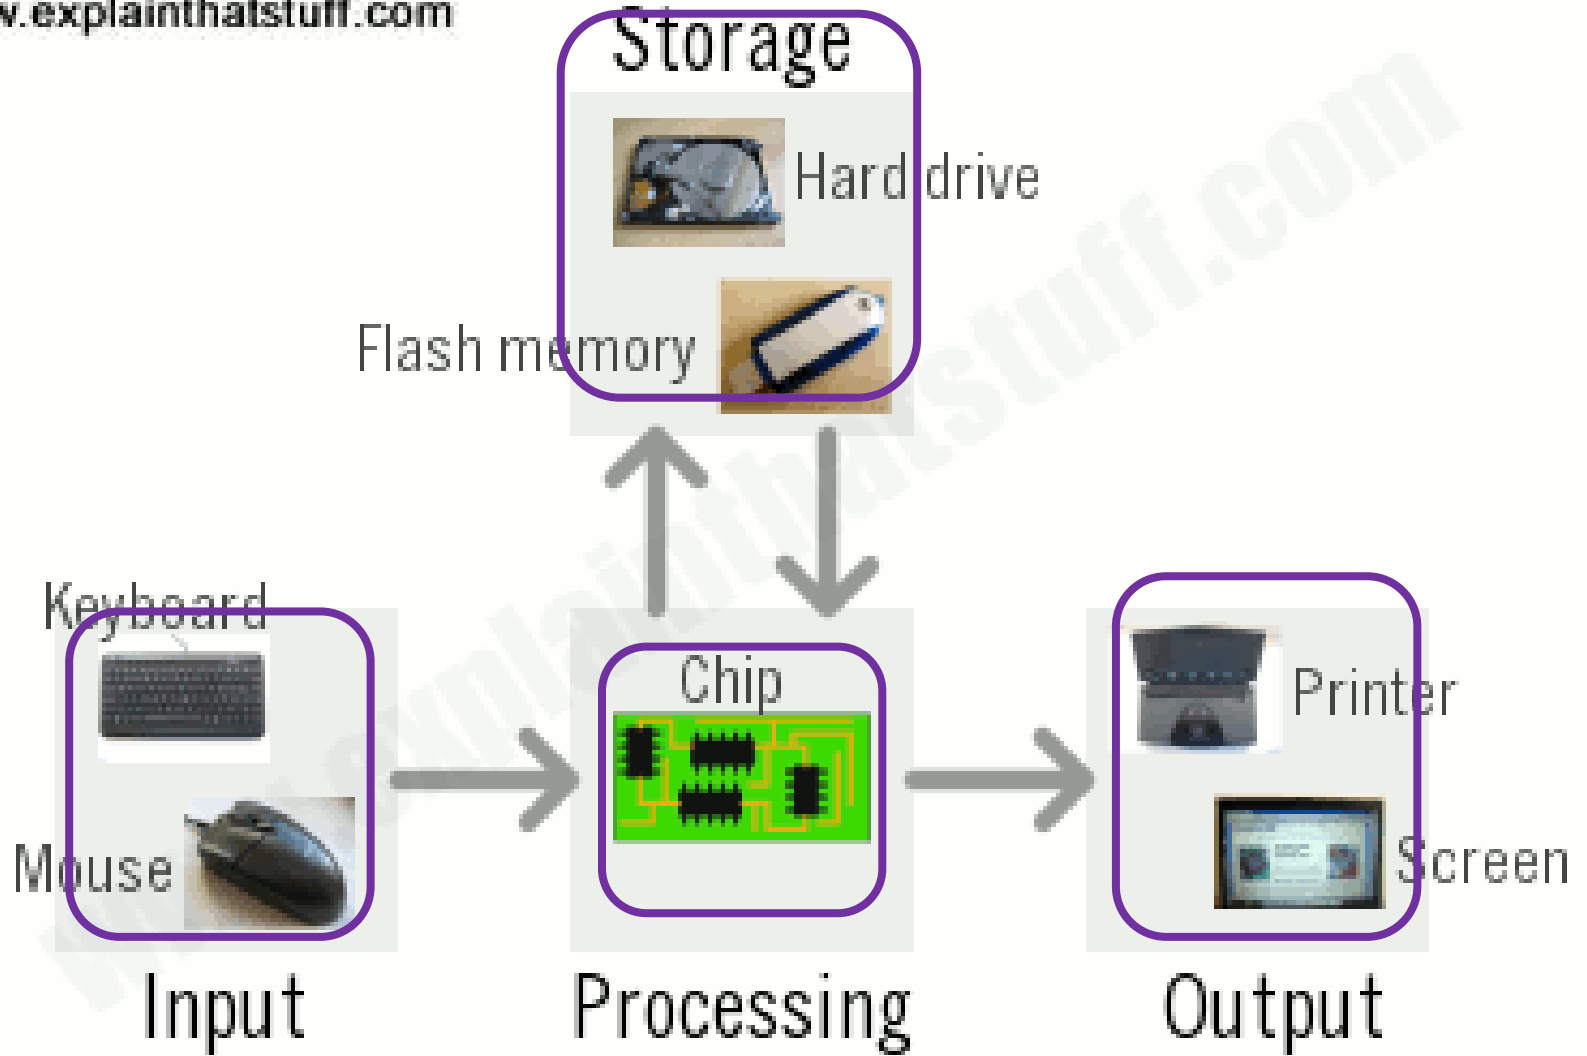

HARDWARE

SOFTWARE

www.explainthatstuff.com

# A Computer System

All the different parts of a computer, including the devices you plug into it, are known collectively as 'a computer system'.

# Hardware: Central Processing Unit (CPU)

- Perform computation based on a command (a series of instructions)
- Instructions: add/mult, comp, read/write, etc.
- Cooperate with memory and storage and input/output unit.

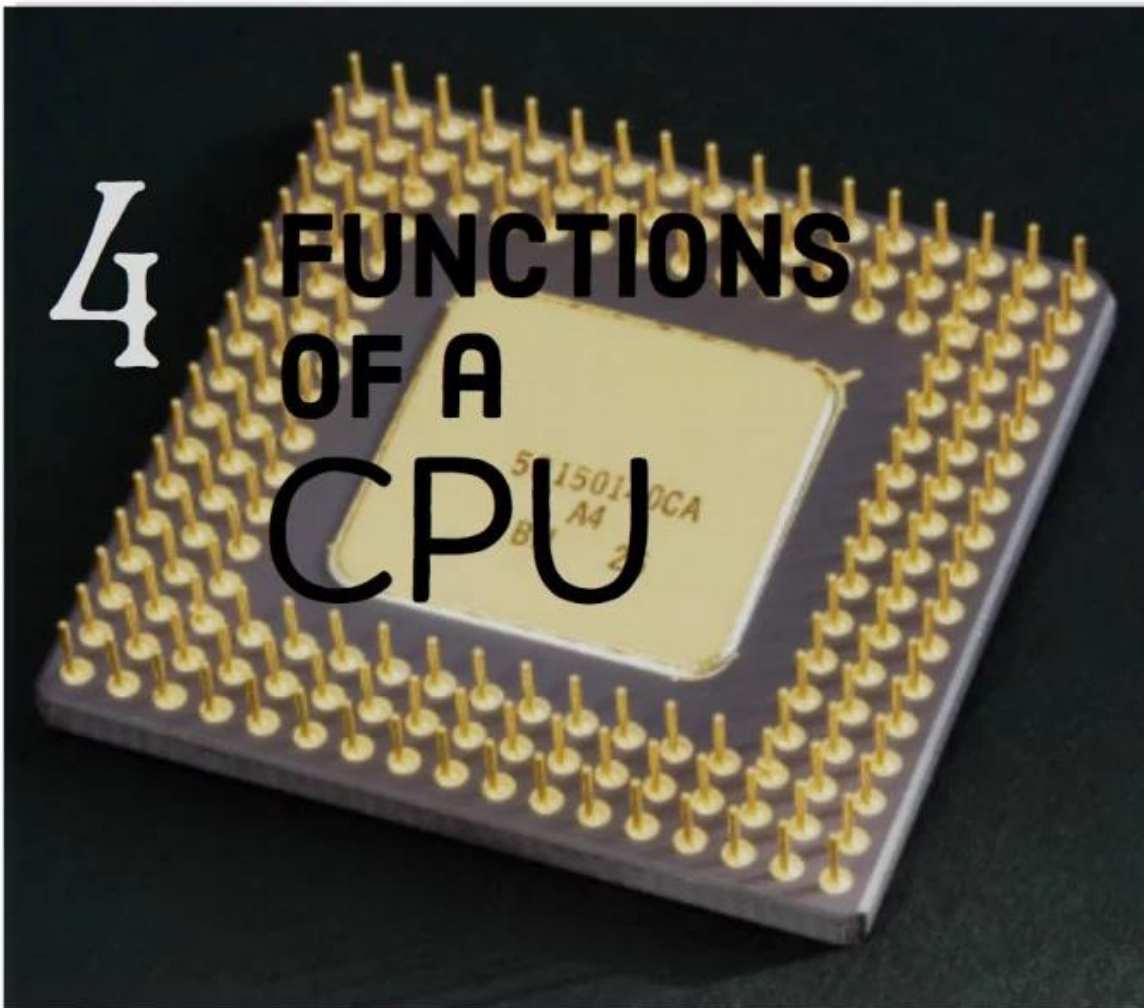

# Example

Command: Opening Firefox browser

- Consist of millions of instructions (e.g., add/mult/read)

# 4 Steps of CPU Process

**4** **FUNCTIONS**  
**OF A**  
**CPU**

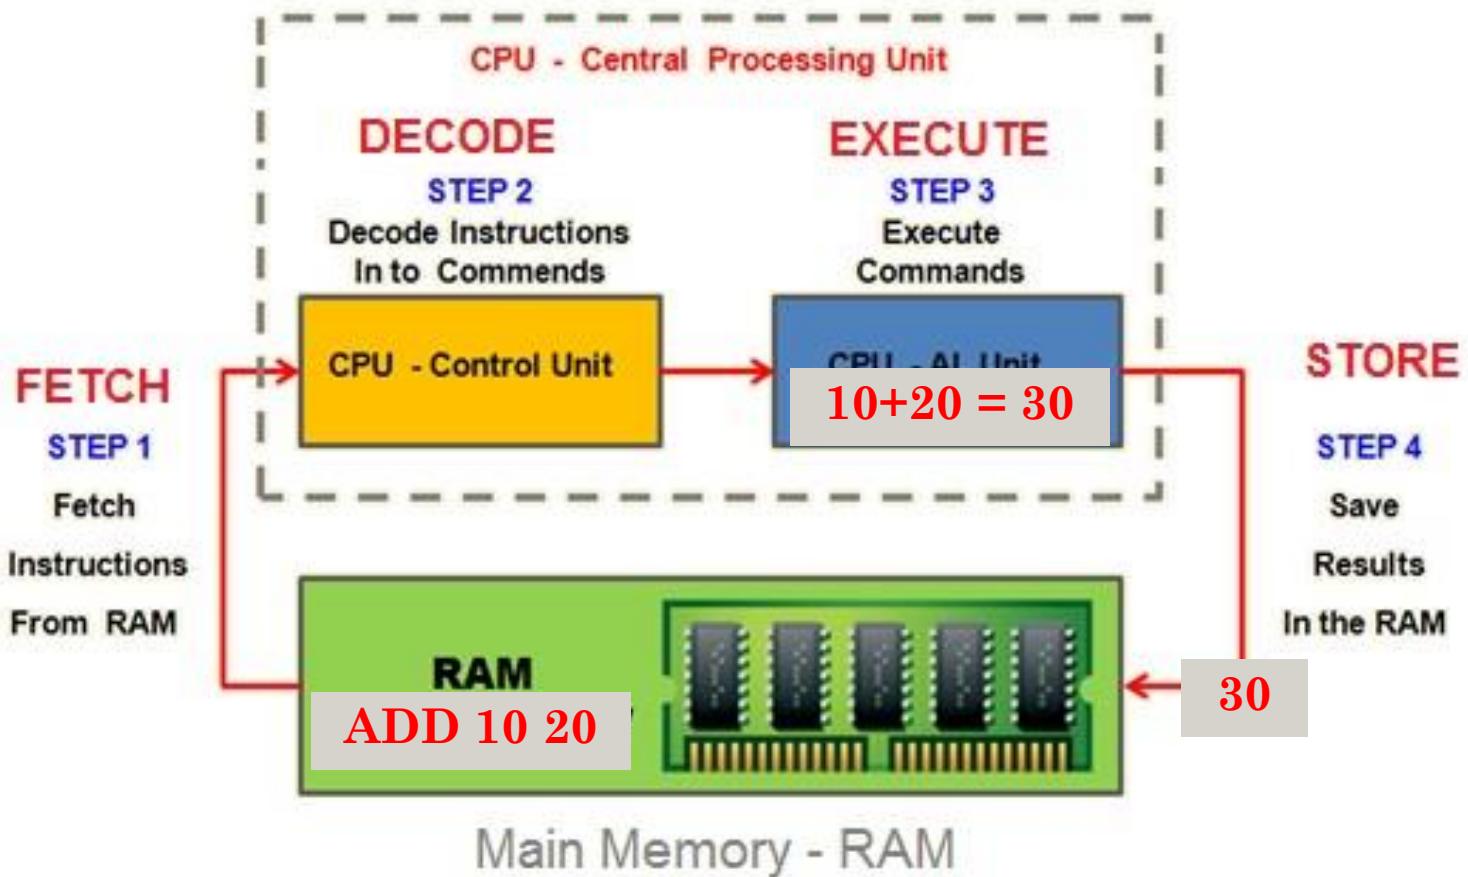

**FETCH**  
instructions from  
memory

**DECODE**  
into binary  
instructions

**EXECUTE**  
action and move  
to next step

**STORE**  
write output to  
memory

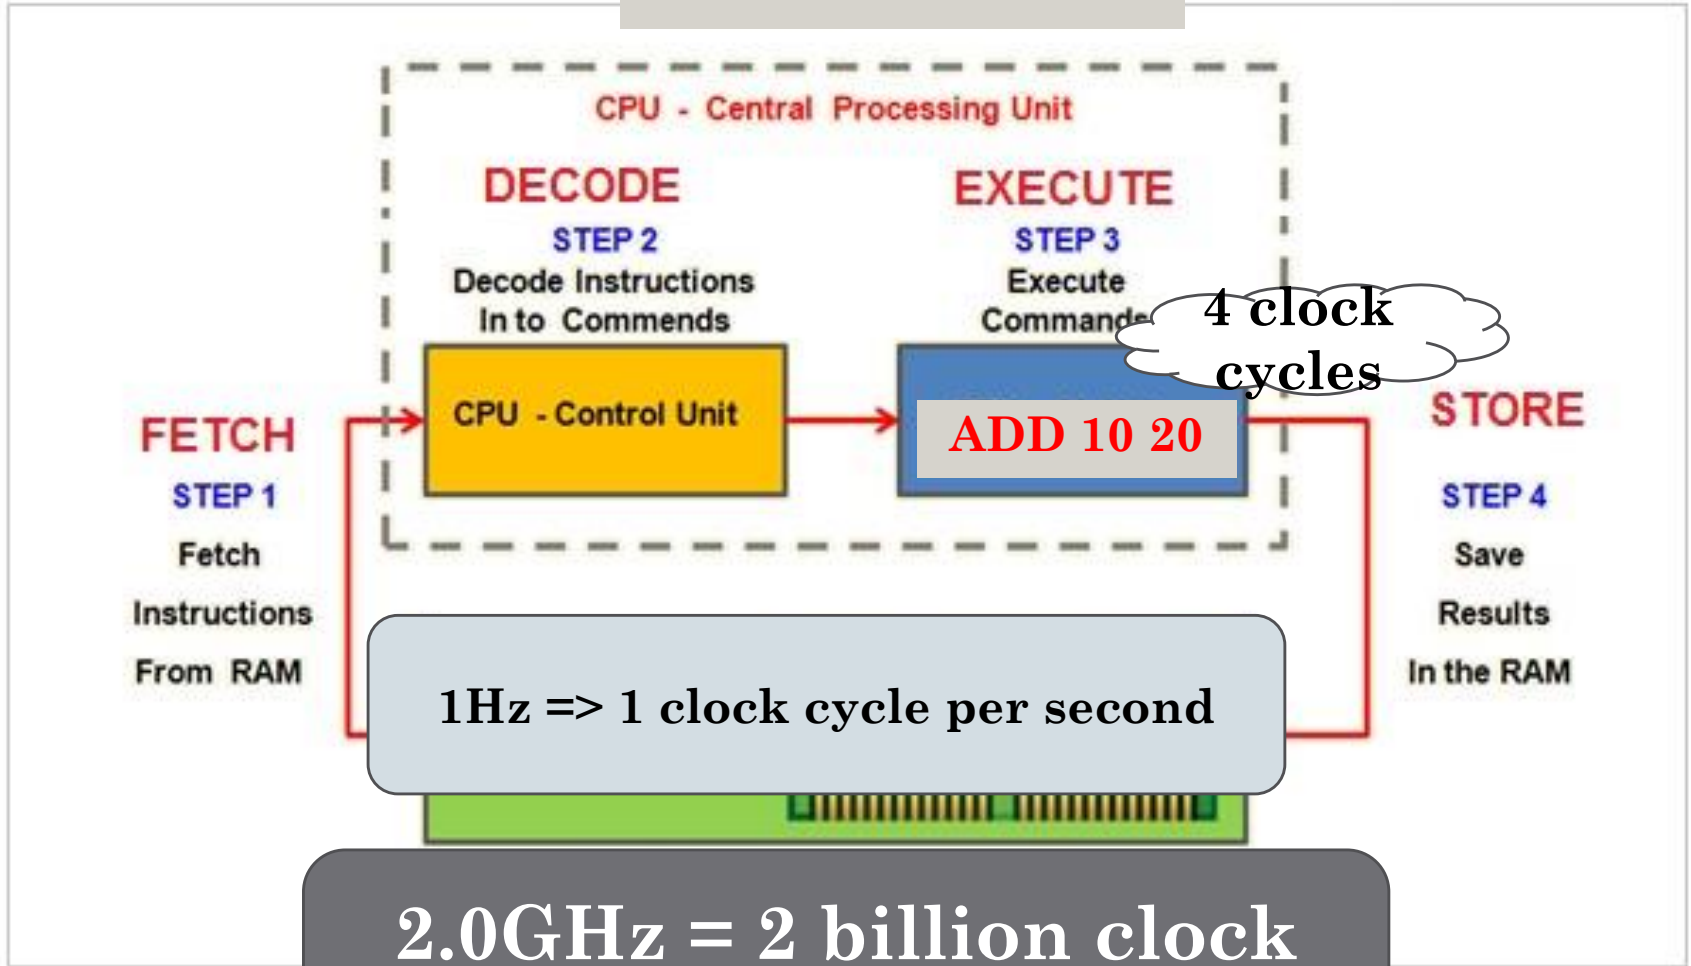

# Central Processing Unit - Machine / Instruction Cycle

www.learncomputerscienceonline.com

# Central Processing Unit Instruction Cycle

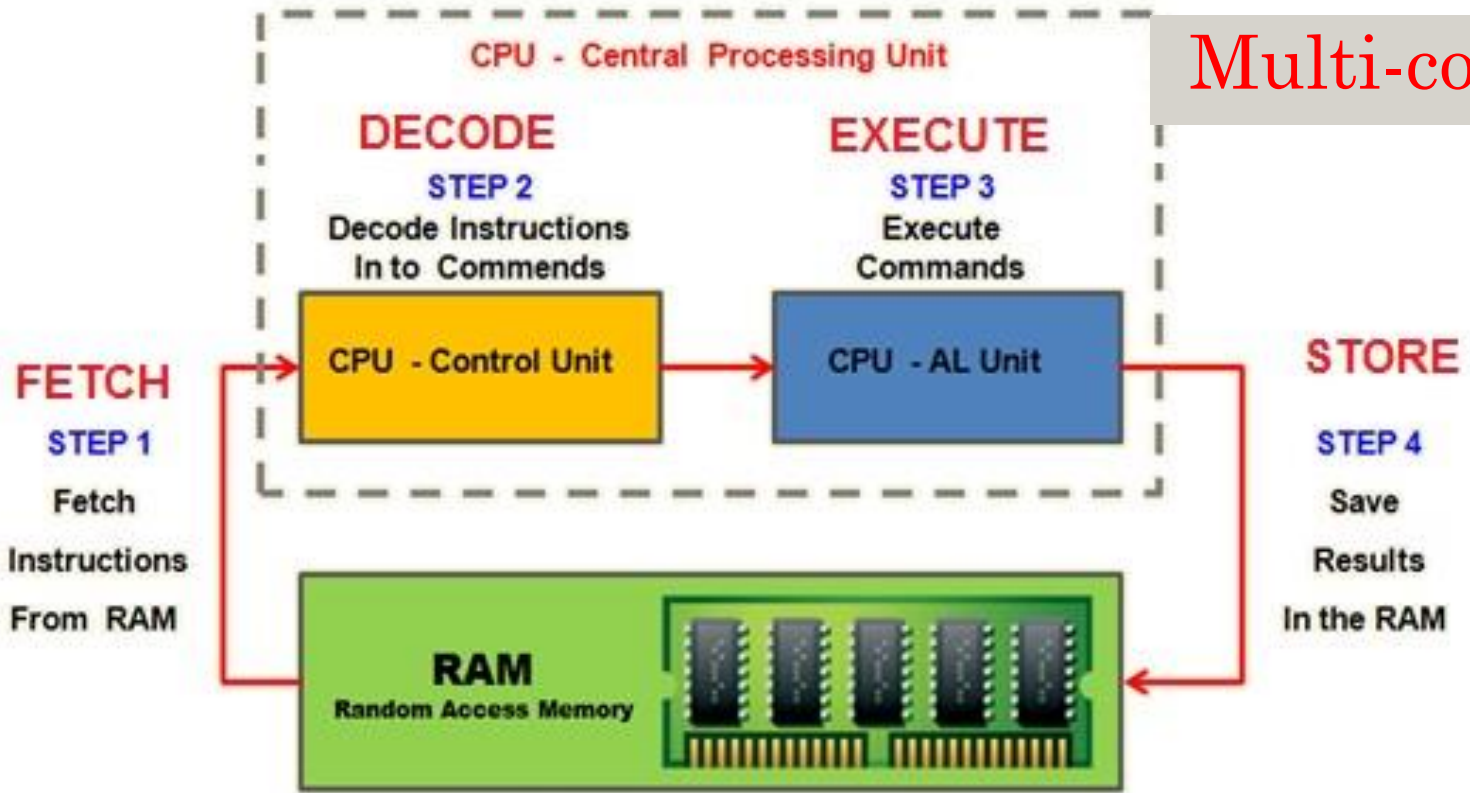

**2.0GHz CPU**

**2.0GHz = 2 billion clock cycles per second**

# Central Processing Unit - Machine / Instruction Cycle

Multi-core?

Main Memory - RAM  
www.learncomputerscienceonline.com

# Hardware: Memory (RAM)

- Store data, command of CPU, and set of codes while the computer is running
- Volatile: erased upon reset
- DRAM, SRAM

# Hardware: Storage Units

Non-volatile memory

- Hard disk drive
- Solid State Drive (SSD)
- External Hard drive
- Flash Drive

Internal vs External Storage

# RAM vs Storage Units

## RAM

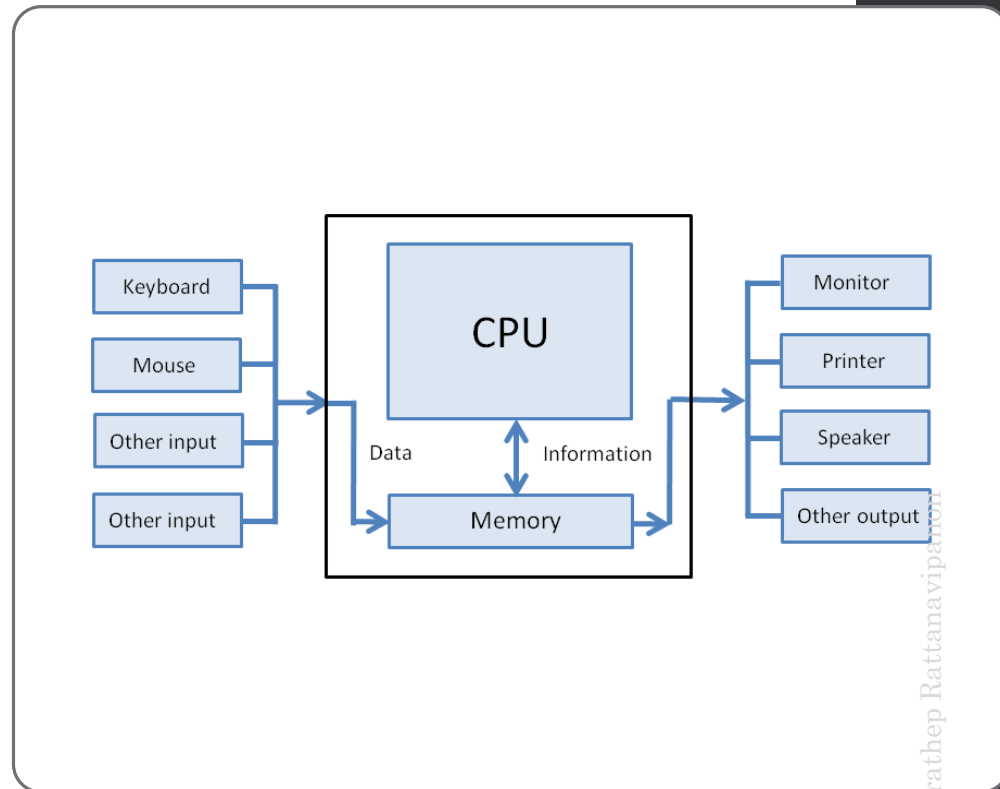

- Volatile
- Faster access time
- More expensive (32GB)
- Low-capacity RAM: programs will be running slowly

## Storage Units

- Non-Volatile
- 4x Slower access time
- Much cheaper (1000GB)
- Low-speed storage units: it will be slow to start programs

# Hardware: Input/Output Units (I/O Units)

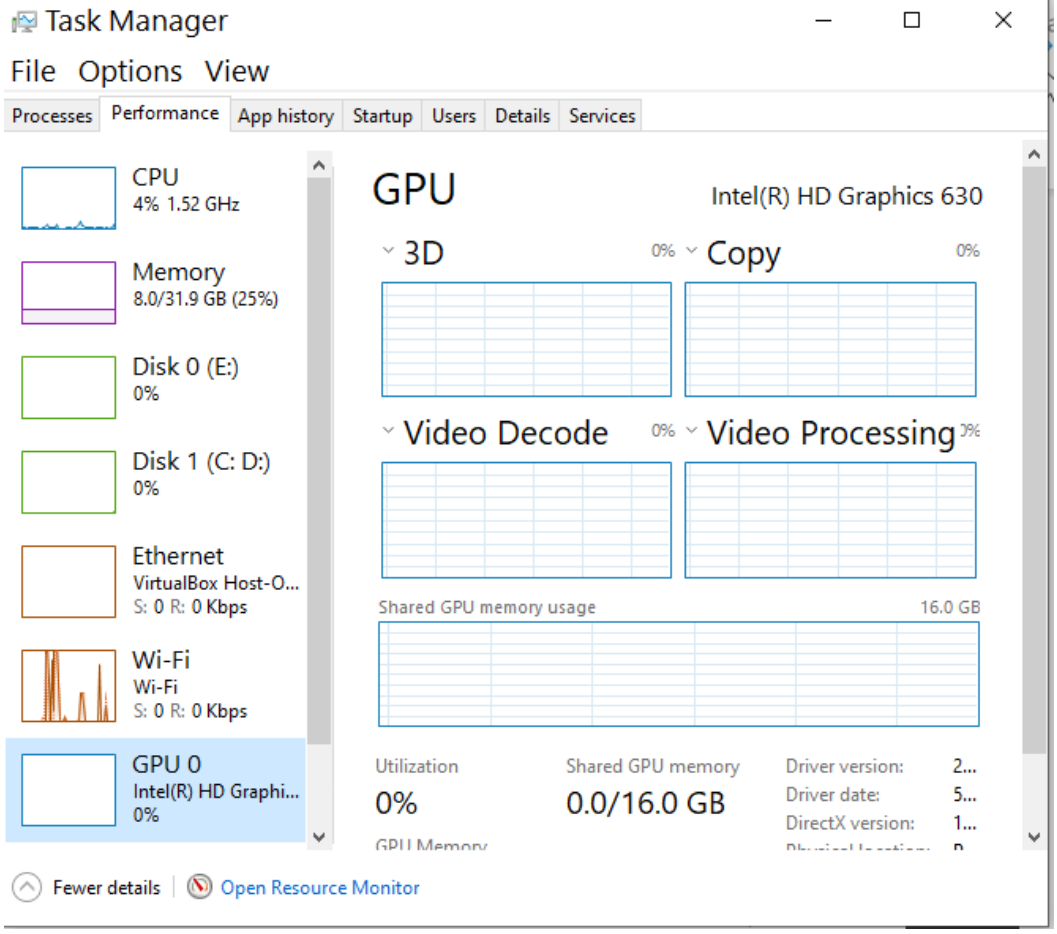

- Input Units
  - Can “input” data (or command) to computer
- Output Units
  - Can receive “output” data from computer
- Both Input and Output Units

# Special Hardware: GPU

- Similar to CPU
- Lower speed than CPU but...
- **700-4000** cores vs 8 cores in CPU
- Specific purpose: performing many complex math calculations at the same time
  - Mainly for **rendering graphics**
  - Other use-cases: training machine learning model, bitcoin mining
- Has its own memory (RAM)

# How to check current hardware utilization?

# Recap:

- Computer Systems: hardware and software
- Consist of 4 components
- Processing Unit: CPU
  - Perform computations
  - Interface with other components
  - CPU speed, multi-core
- Memory: RAM
  - Volatile memory
  - What happens if RAM has low-capacity (e.g., <1GB)?
- Storage Units
  - Non-volatile memory
  - What happens if Storage Units have low-speed (slow)?
- Input/Output Units (Devices)
  - Receive data from physical world
  - Output data to physical world
- (Optional Component) Graphic Processing Unit (GPU)

# Activity: Kahoot Time!

[www.kahoot.it](http://www.kahoot.it)

# Q11: Kahoot

**How many ADD instructions can 2.1GHz CPU execute in one second? (Assume executing one ADD instruction takes 4 clock cycles)**

**Answer:**

**1GHz = 1000 million Hz**

**1Hz = CPU can execute 1 clock cycle per second**

**2.1GHz = CPU can execute 2100 million clock cycles per second**

**Executing one ADD instruction takes 4 clock cycles**

**So, 2.1GHz CPU can execute  $2100/4 = 525$  millions ADD instructions per second**

# Software

- System Software
- Application Software

# Key Differences

## System Software

- Necessary for computer to work
- Operate hardware
- Run in background
- Run independently

## Application Software

- Can be uninstalled without causing computer to fail
- Used by users to perform task
- Direct interaction with users
- Depend on system software

# System Software

# Windows 10

## Device Requirement Specification

- Processor: 1 gigahertz (GHz) or faster processor.
- RAM: 1 gigabyte (GB) for 32-bit or 2 GB for 64-bit.
- Hard disk space: 16 GB for 32-bit OS 20 GB for 64-bit OS.
- Graphics card: DirectX 9 or later with WDDM 1.0 driver.
- Display: 1024 x 600 or above.

- Device Manager
- Remote settings
- System protection
- Advanced system settings

## View basic information about your computer

### Windows edition

Windows 10 Pro

© 2016 Microsoft Corporation.  
All rights reserved.

# Windows 10

### System

Processor: Intel(R) Core(TM) i3-4130 CPU @ 3.40GHz 3.40 GHz

Installed memory (RAM): 2.00 GB

System type: 64-bit Operating System, x64-based processor

Pen and Touch: No Pen or Touch Input is available for this Display

### Computer name, domain, and workgroup settings

Computer name: DESKTOP-0PCEOSN

[Change settings](#)

# How to check your PC specification

# Team Task (10-minute): Can the following laptop install Windows 10?

## Laptop 1 Specification:

CPU: Intel Core i7 2.4 GHz

Ram: 8 GB

Storage: SSD 128 GB

Display: Full HD 1920 x 1080

Yes/No?

Is it OK in real life?

## Laptop 2 Specification:

CPU: Intel Core i5 2.0 GHz

Ram: 2 GB

Storage: Hard disk 1 TB

Display: Full HD 1920 x 1080

Yes/No?

Is it OK in real life?

# Team Task (10-minute): Answer the questions

**1. Find the specification of the cheapest android phone?**

Answer:

CPU: 1.3GHz

RAM: 1GB

Storage Unit: 8GB

Display: 800 x 600

**2. Find the specification of the cheapest iPhone?**

Answer:

CPU: 1.84GHz dual(2)-core

RAM: 2GB

Storage Unit: 16GB

Display: 640 x 1136

# System Software: Utility Software

- Utility software is the program that was developed to support application software.
- Examples: compress file program, anti-virus program.
- Anti-virus software is a utility software (Avast, Norton, Bitdefender, Windows defender, Malwarebytes, etc.)
- **Why do we need anti-virus software for your PC/laptop?**
- **Do we need anti-virus software for MacBook Pro?**
- What is the anti-virus software installed on your computer?

# Application Software

- Microsoft Office 365
- Firefox browser
- Google Suite (Google Form, Google Sheet, Google Docs, etc.)
- Anything else?

1. ABC: Photoshop\_\_\_\_\_
2. Boom: Adobe Acrobat Reader\_\_\_\_\_
3. Flowers: Twitter\_\_\_\_\_
4. HopeStar: Teamviewer \_\_\_\_\_
5. InformationAge: Final Cut Pro X\_\_\_\_\_
6. ReturnOfTheKing: Steam \_\_\_\_\_
7. Storm: Zoom\_\_\_\_\_
8. ZBC: Tantan\_\_\_\_\_

# Information Technologies (IT)

# Two Parts of IT

## Computer Technology

How information is stored and processed

## Communications/Telecommunications Technology

How information is transmitted and received

The technology that accepts data (raw data, raw images) and processes, or manipulates into information we can use, such as summaries, reports.

# Computer Technology

# Communications/Telecommunication Technology

Consist of electronic devices and system for communicating over any distance.

- The computer network is needed for the communications technology.

# Two Parts of IT

## Computer Technology

How information is stored and processed

## Communications/Telecommunications Technology

How information is transmitted and received

What can you do  
with IT?

# Education Technology (EdTech)

## Online Learning

### 1). Learning Management System (LMS)

- <https://lms2.psu.ac.th>
- Google Classroom

### 2). Massive Open Online Course (MOOC),

[https://en.wikipedia.org/wiki/Massive\\_open\\_online\\_course](https://en.wikipedia.org/wiki/Massive_open_online_course)

- It is an [online course](#) aimed at unlimited participation and open access via the [web](#)

Initiatives	Nonprofit	Free to access	Certification fee	Institutional credits
edX	Yes	Partial	Yes	Partial
Coursera	No	Partial	Yes	Partial
Udacity	No	Partial	Yes	Partial
Udemy	No	Partial	Yes	Partial
P2PU	Yes	Yes	No	No

MOOC Providers

# What are the popular communication software for education?

- Email
- Line/WeChat
- Facebook
- Skype/Zoom
- etc

# Healthcare

- Telemedicine
- Robot medicine
  - Robot surgeons
- Mobile Health Tech
  - Apple watch/Smart watch
- etc.

# Money & Business

- Online shopping
  - LAZADA
  - SHOPEE
  - ALIEXPRESS
  - EBAY

## Online Payment

- PromptPay
- WeChat/Alipay
- etc.

Anything else?

1. Taobao.com \_\_\_\_\_
2. Meituan \_\_\_\_\_
3. Amazon \_\_\_\_\_
4. Grab
5. JD
6. Unionpay

# Jobs & Careers

Can you list some websites/applications or technologies related to finding jobs?

1. www.jobtopgun.com
2. Indeed.com
3. LinkedIn.com
4. 58.com
5. CareerBuilder
6. Beyond.com

# Social Networking

## Meaning:

- Social Networking is an online platform which people use to build social networks or [social relationship](#) with other people who share similar personal or career interests, activities, backgrounds or real-life connections.
  - Wikipedia, [Online]. Available:  
[https://en.wikipedia.org/wiki/Social\\_networking\\_service](https://en.wikipedia.org/wiki/Social_networking_service)
- Facebook
- Instagram
- WeChat
- Pinterest
- etc.

Do you know  
Cybersecurity?

Cybersecurity is the practice of protecting systems, networks, and programs from digital attacks.

# Activity: Kahoot!

[www.kahoot.it](http://www.kahoot.it)

# Q/A

# Homework (5-10 Mins Presentation)

Pick an operating system:

- [HarmonyOS/Hongmeng OS](#)
- Ubuntu
- Microsoft Windows
- MacOS
- Android
- FreeBSD
- Raspberry Pi OS
- Fedora

Research and present using PowerPoint:

1. Who made this OS? When was it made? (25%) [If your team has 4 members, you can skip this question]
2. What kind of devices (e.g., mobile phones, laptops, embedded devices, servers) can use this OS? (25%)
3. What are the highlight features? (25%)
4. What is the competitive OS? Why? Give some explanation. (25%)

# Team Selection:

- ReturnOfTheKing -> macOS
- InformationAge -> macOS Big Sur focusing on what is new and different from previous macOS
- Storm -> Windows
- HopeStar -> Android
- ABC -> FreeBSD
- Boom -> Raspberry PI OS
- Flowers -> HarmonyOS/HongmengOS
- ZBC -> Fedora
